With **EXFO Connect**, all data that relates to test equipment and test data can easily be brought together to enhance business decisions and **make processes more efficient**.

#### TEST EQUIPMENT MANAGER

- SW download
- SW auto-install
- Remote Control \*

#### FTB Anywhere™

- Floating License assign/release

#### File Manager

- File upload/download\*

#### TEST DATA MANAGER

- Test Data upload \*

#### GENERIC CAPABILITIES

- Back-office integration\*

#### Report Manager

- Reporting & Analytics \*

\* Supported in Contractor Mode

ensures all **test equipment is up-to-date** according to each manager's specification. It also provides a **global view** of the entire fleet of test equipment, supports centralized **remote control** and enables FTB Anywhere™ **shared test licenses**.

## Centralize and Automate

is your license to say "No" to worrying about field efficiency, budget and logistics. Enable your **entire workforce** to get the required functionality **anywhere, anytime**.

## Share Test Licenses

### Pushing the limits of testing cost-efficiency

**No more:** Technician A needs 10G capability, but that unit is with technician B (300 miles away).  
**Now:** 100% functionality for all your technicians, in any testing situation.

### Maximum flexibility within your budget

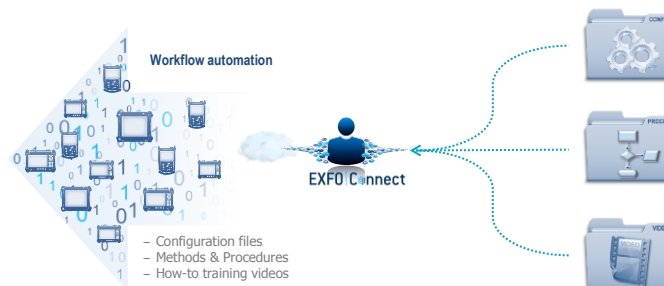

**No more:** Having to decide which units and which technicians get the upgrade.  
**Now:** Without "upgrading" the budget, all your units and technicians can use the licenses.

### Eliminating logistical nightmares

**No more:** Having to ship units for upgrades (with the costs and delays that it entails).  
**Now:** Instantaneous access to needed features, no shipping, no delays.

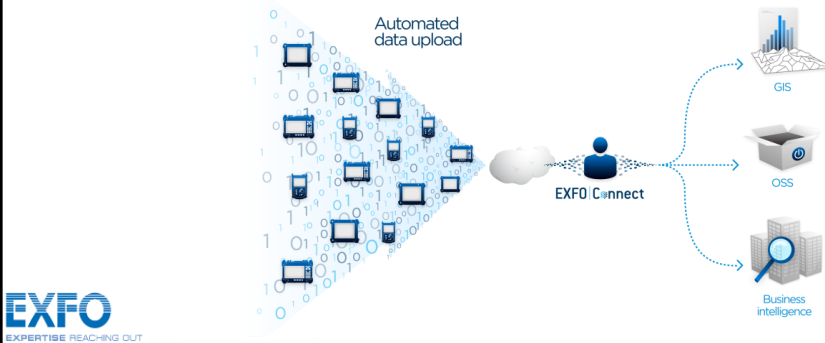

supports **work order flow through** via equipment profile creation and configuration file download. It ensures **consistent** testing methodology by enabling sharing of **methods and procedures** documentation and even "how-to" training videos.

## Organize and Distribute

automatically consolidates data from **multiple sources** and makes it **searchable**.  
 It ensures seamless **data storage and test report accessibility**. **Data security and integrity** is maintained to prevent tampering of test results.

## Store and Consolidate

is what makes all the collected data **useable** in the real world; by **correlating the data from the field** into a single source of information.  
 By tailoring this data to **different members of the organization**, **better decision-making** can be made.

## Create and Customize

# Contractor Mode

the art of

communication

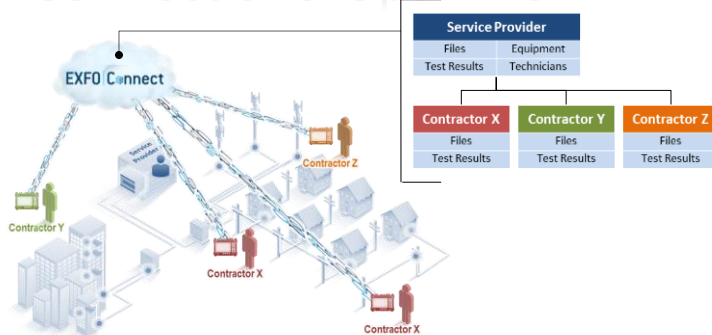

## Contractor Mode

the art of  
optical  
communication

enables service providers to **automate test workflow** for contractors who provide testing services for them.

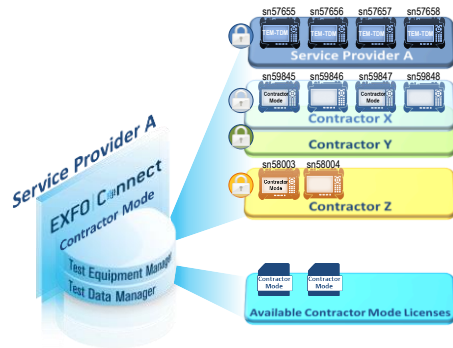

It provides **instantaneous visibility** to network performance and contractor scheduling, **best practice** enforcement, **remote coaching** and **right-first-time** deployment.

### Connect and Optimize

## Connect contractors' test sets to Service Provider's EXFO Connect environment

- Secure, segregated access
- Test Results upload
- File download
- Remote Control

## Contractor Mode

- Server license
- Annual test set licenses
  - can be 'reassigned' – when contractor finishes job

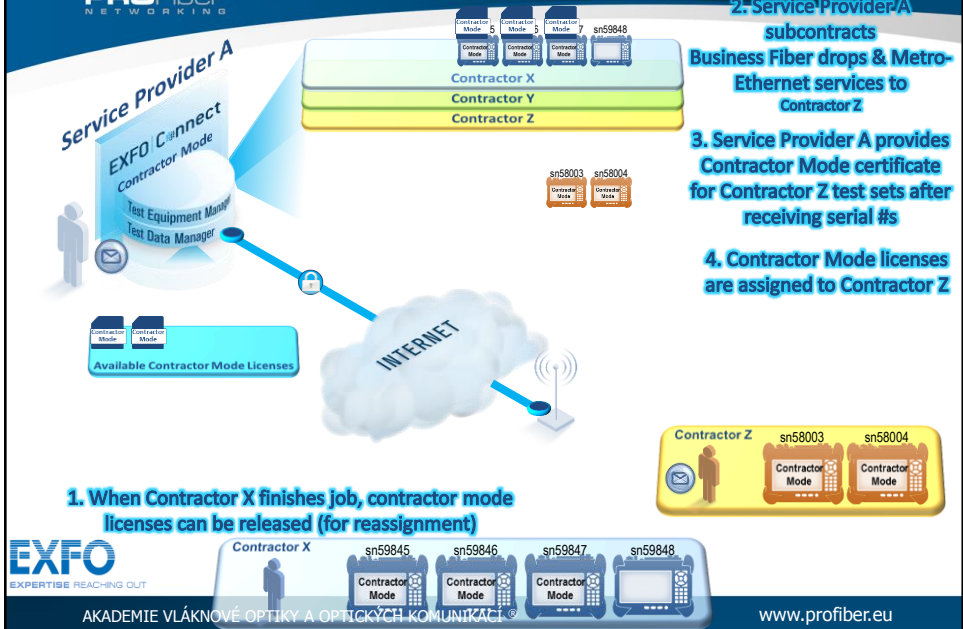

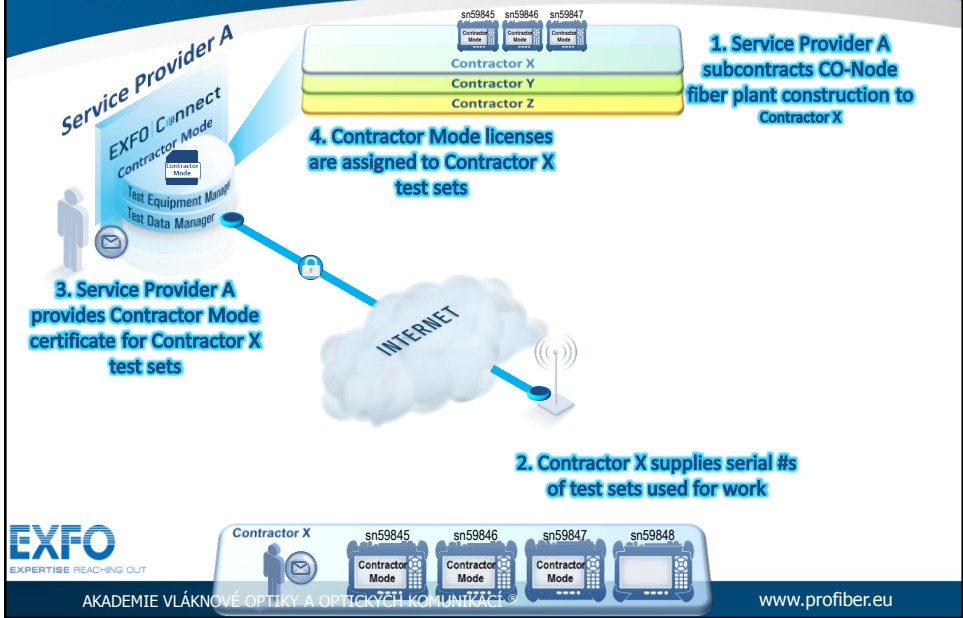

## Optimizing workflow

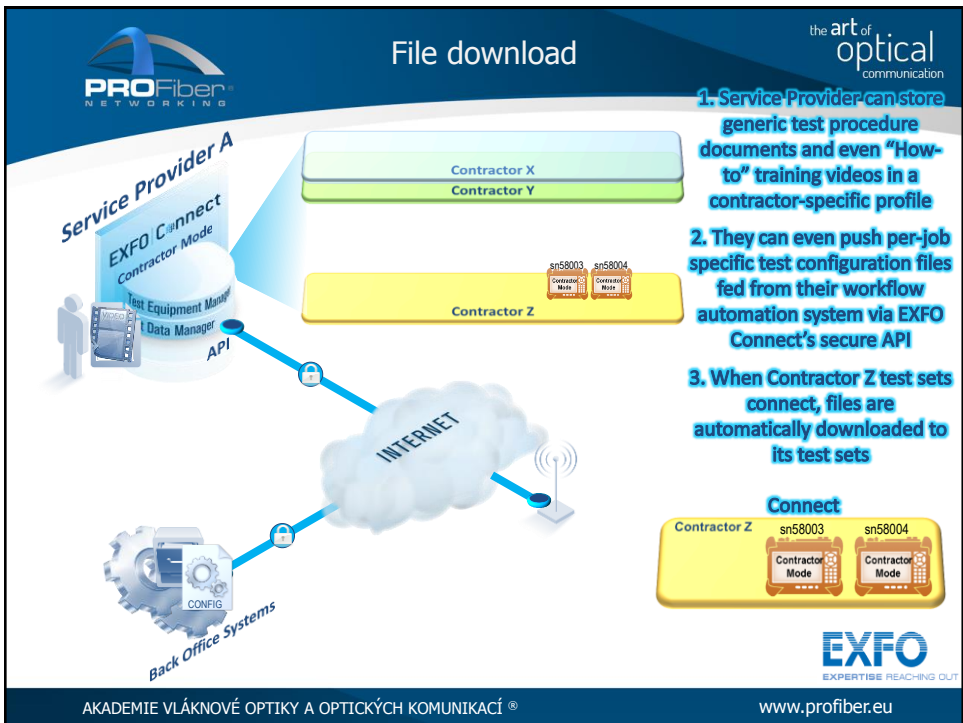

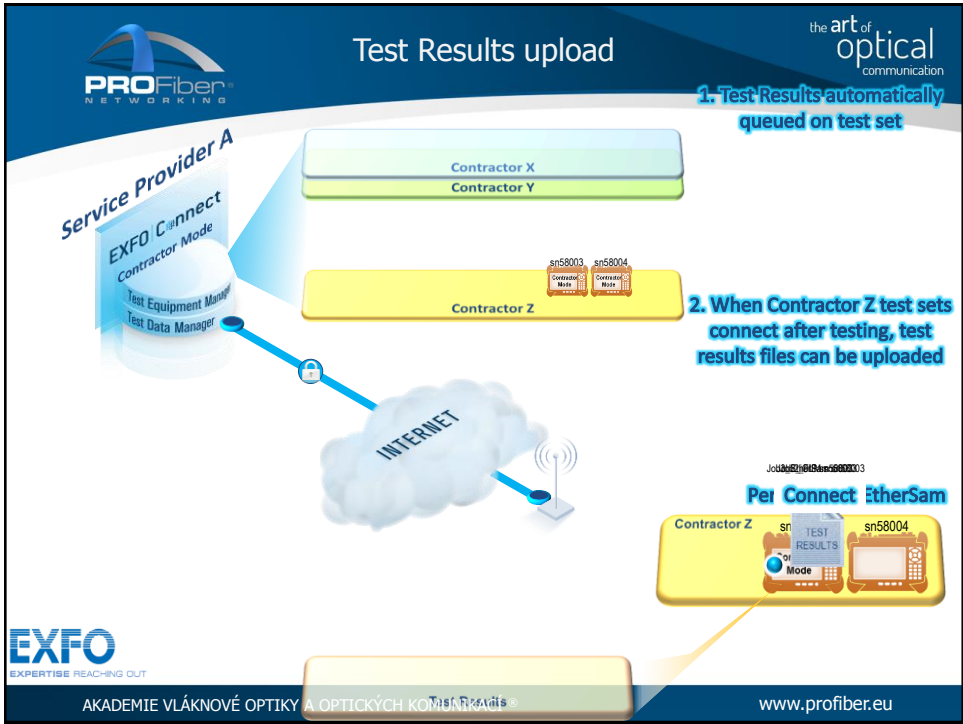

### SERVICE PROVIDER CONCERNS

- Deployment schedule on track?
- Right tests being done?
  - Following MOP? (end face inspection, EtherSAM)
- Tests being done correctly?
  - Correct circuit config.
  - Correct threshold settings
  - Correct test duration
- Get Pass/Fail results quickly
  - Determine corrective action ASAP after problem trend detected
  - Minimize unnecessary truck-rolls

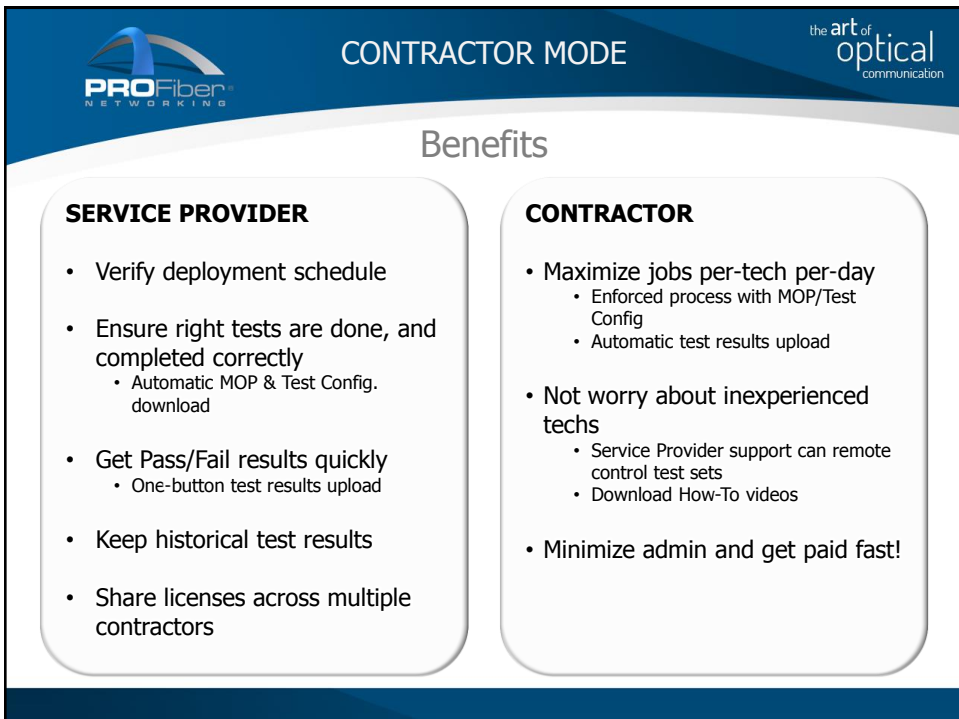

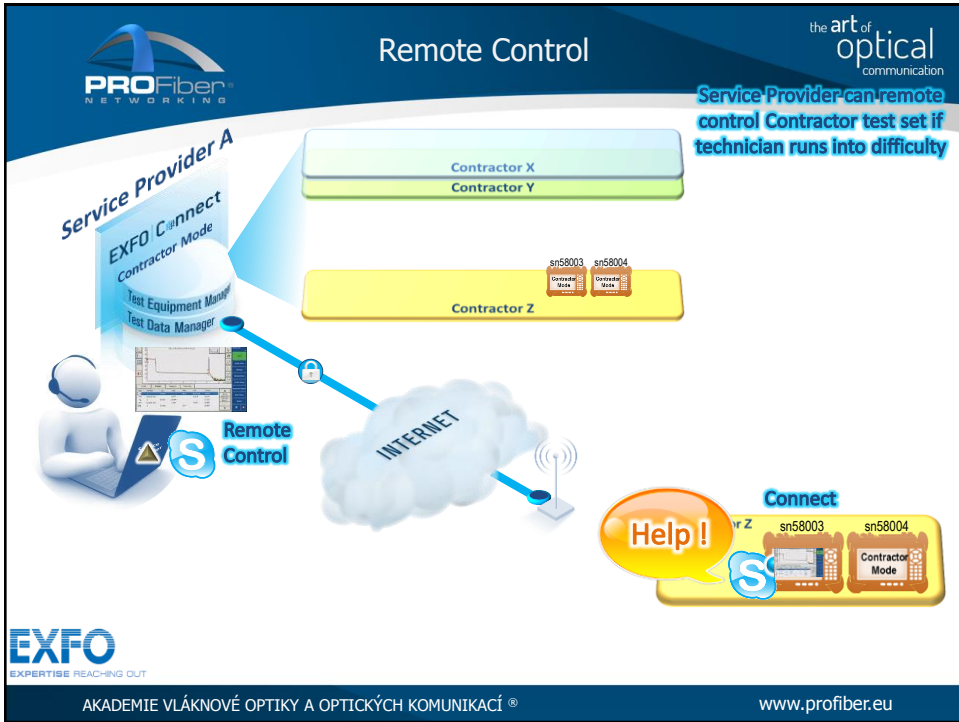

### CONTRACTOR CONCERNS

- Maximize jobs per-tech per-day
  - Easy-to-follow repetitive process
  - Waste less time troubleshooting
  - No USB swapping/file management & end-of-day report creation
- Less-experienced workforce
- Minimize administrative time
  - Checking if jobs completed
  - Collecting all results files
  - Forwarding correct results files to correct service provider
- Getting paid ASAP after job done!

Děkujeme
