

FIP-400B Fiber Inspection Scope Series

AUTOMATED WiFi & WIRED INSPECTION TOOL WITH EMBEDDED ANALYSIS

Fully automated fiber inspection solution delivering fast and consistent test results for single fiber connectors and also able to inspect multifiber connectors from a single tool. Simplifies the overall process providing accurate and consistent test results, and performing pass/fail assessments quickly and easily.

KEY FEATURES

- 100% automated for single fiber connectors, one step inspection process
- Screenless operation enabled by pass/fail LED indicator
- On-board connector endface analysis (IEC or custom standards)
- Feature-rich ConnectorMax2 mobile application compatible with Android™ and iOS™ devices¹
- Full reporting capabilities on mobile devices and EXFO test platforms
- All-day battery life that will never let you down¹
- MF-ready scopes compatible with single-fiber and automated multi-fiber tips
- Manufacturing automation using REST API available upon request

APPLICATIONS

- Central offices, exchanges and headends
- Data centers
- Wireless (e.g., 5G, FTTA, DAA, small cells)
- Fiber-to-the-home (FTTH)

SUPPORTED CONNECTORS

- Single-fiber connectors such as SC, LC, FC, ST and others
- MPO, MTP², Q-ODC-12³, HMFOC⁴, OptiTip⁵ and MT connectors
- Single and dual-row, multi-fiber connectors (12/24 or 16/32)

Notes

- ¹ Wireless models FIP-4X5B Series
- ² MTP is a registered trademark of US Conec Ltd.
- ³ Q-ODC is a registered trademark of HUBER+SUHNER
- ⁴ HMFOC is a registered trademark of CommScope Inc.
- ⁵ OptiTip is a registered trademark of Corning Cable Systems

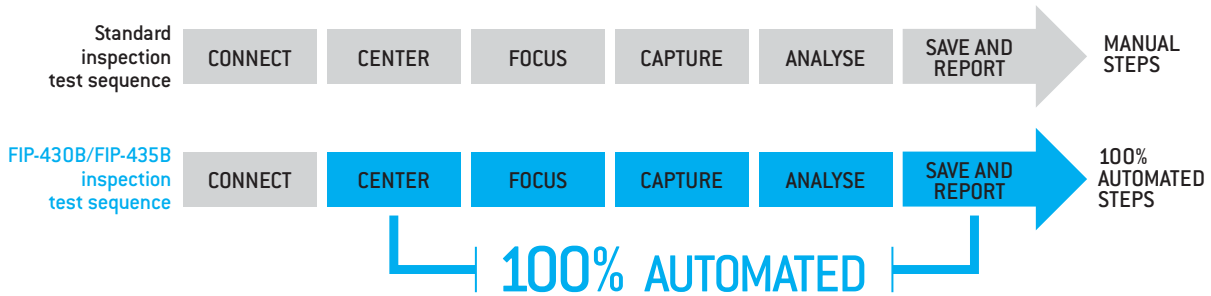

SPEC SHEET

EXFO

AUTOMATING THE COMPLETE INSPECTION PROCESS

Turning fiber inspection into a one-step process

Enabled by its unique automatic focus-adjustment system, the FIP-430B and FIP-435B automates each operation in the test sequence, transforming the critical inspection step into a quick and simple one-step process accessible to technicians of any skill level.

Automated focus adjustment

Ensures that each connector image is captured at maximum quality for enhanced identification of defects.

Focus protection

Prevents image capture in the event of improper focus adjustment. This ensures that no performance-affecting defects or residues are ignored in the analysis, thus preventing the reporting of false-positive results.

Figure 1. An out-of-focus image can hide critical defects capable of delivering a “pass” verdict.

Figure 2. An optimized focus adjustment will ensure that all defects affecting performances are seen.

Operation modes

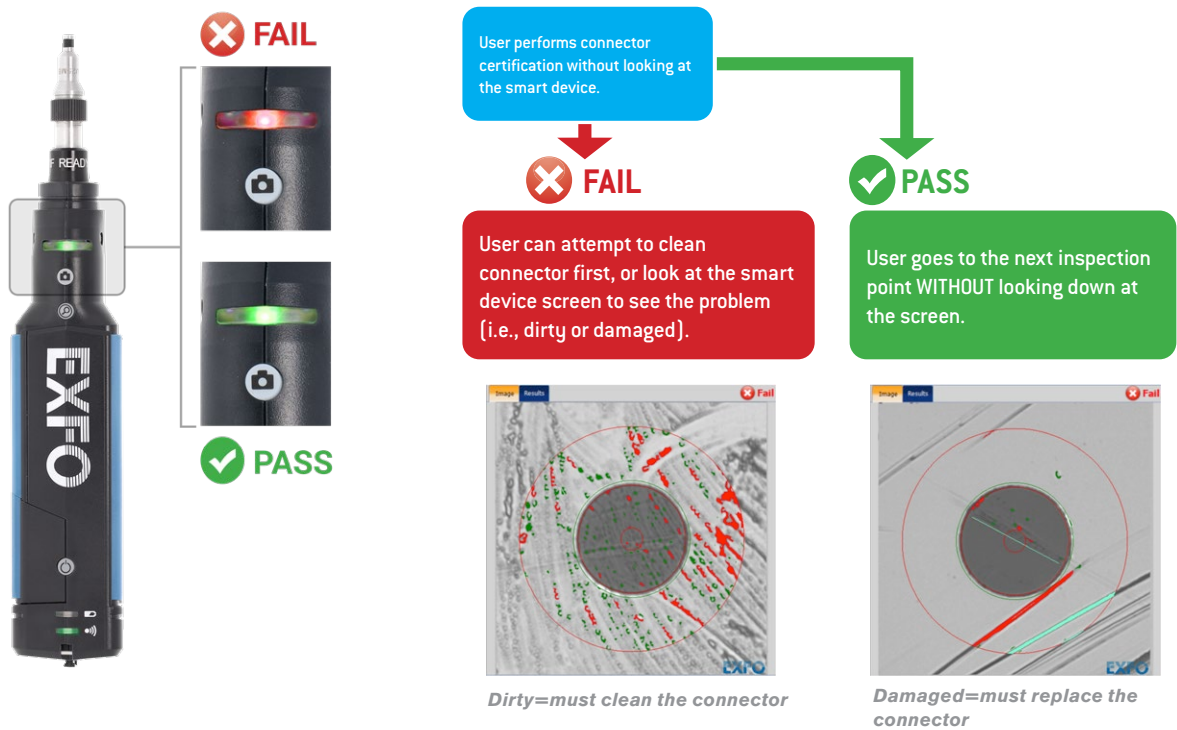

FIP-4X5B Series scopes (FIP-415B/FIP-425B and FIP-435B) are compatible with iOS and Android devices. Live video feed is streamed via WiFi without any wired connection required between the scope and the smart device.

The wireless scope is also compatible with EXFO’s FTB and MaxTester platforms (connected via USB cable or WiFi) as well as ConnectorMax2 software (on a Windows-based PC platform).

FIP-4X0B Series scopes (FIP-410B/FIP-420B and FIP-430B) are USB wired inspection scopes compatible with EXFO’s FTB and MaxTester platforms as well as ConnectorMax2 software (on a Windows-based PC platform).

SCREENLESS OPERATION

Thanks to the pass/fail LED, users can perform connector certification without having to look back at the smartphone or MaxTester display screen to view the results. Users can simply focus on getting ready for their next inspection and being able to use both hands in the process.

FIP-400B UNIVERSAL COMPATIBILITY

Thanks to its USB port, the FIP-400B Series is compatible with the entire FTB ecosystem, the MaxTester 700B OTDR Series, MaxTester 940/945 OLTS, the MAX-FIP display, LTB platforms as well as PCs and laptops.

GET ACCURATE INSPECTION RESULTS

The autofocus feature in the FIP-430B and FIP-435B not only greatly facilitates inspection, but also enables optimized focus adjustment to ensure detection of all defects capable of affecting connector performances.

The system self-adjusts the image centering to ensure that all inspection zones are visible, and then automatically adjusts the focus to achieve the best optical resolution. Next, the IEC, or custom standard is applied to deliver accurate certification results in a snap. Fussing with image focusing, centering and inaccurate analysis results is now a thing from the past.

FAST-TRACKING CONNECTOR INSPECTION

When you outsource your fiber testing, you want to be certain that the technician will apply the best practices and properly certify every connector. Neglecting to do so, at this critical step, will lead to serious, time-consuming problems. The new FIP-400B Series is the result of years of fiber-inspection experience in the field.

THE FIP-400B'S HASSLE-FREE, AUTOMATIC IMAGE-CENTERING FEATURE SAVES PRECIOUS TIME

57%

shorter
inspection
time

- Save over two hours on a typical FTTH cabinet inspection – 432 fibers
- 14-second inspection time per port (down from 32 seconds)*
- \$25 000 in potential savings in one year (based on one cabinet inspection per day at a cost of \$50 per hour)

* Data sourced from EXFO's case study, with calculation based on typical analysis time. Data based on time savings resulting exclusively from the automatic image centering function.

AUTOMATIC, FIBER IMAGE CENTERING

This function cuts inspection time in half, because it automatically detects the fiber endface and instantly centers the image. The user simply has to focus and capture. This is especially handy when inspecting patch panels and hard-to-reach connectors. It also ensures that users will not miss defects in the critical zones of the connectors.

Hit the bull's-eye, every time.

Low magnification Medium magnification High magnification

TRIPLE MAGNIFICATION MODE

By optimizing the image size, users get a detailed view of all defects. This series features the only scopes in the industry offering three magnification levels.

a. Pass/fail analysis is field upgradable via software option (it will also activate pass/fail LED indicator)

SEMI-AUTOMATED MULTI-FIBER INSPECTION

Users can quickly and easily inspect all multiple- and single-row MPO connectors, without missing any fibers or dealing with the hassle of manipulating one or multiple scanning knobs, and while doing it right the first time. The FIP-400-MF uses a trigger to scan all fibers in an efficient way.

These features make it possible to inspect densely populated panels without having to disturb adjacent fibers that may be carrying information. Users can easily operate this instrument with just one hand—it's automated and fumble-free fiber inspection.

COMPATIBLE WITH VARIOUS SINGLE-FIBER AND MULTI-FIBER CONNECTORS

EXFO offers multiple patchcord tips and bulkhead adapters for both single fiber and multifiber applications.

These tips and adapters are built to fit a wide range of fiber connector types and designs that may be encountered in the field including FC, SC, LC, ST for UPC and APC or FTTH/FTTA connectors. The MPO tip is compatible with single and dual-row multifiber connectors regardless of the connector type.

For further information, please refer to our tip adapter guide.

Thanks to its removable nozzle, the solution can easily and quickly be adapted to various multifiber connector models:

- APC or UPC polishing type
- 12-fiber-row ferrule type for 12-24 fiber connectors
- 16-fiber-row ferrule type for 16-32 fiber connectors

Applications also include Q-ODC-12[®], OptiTip[®] and HMFOC[®] connectors.

Simply swap tips for an easy transition from single to multi-fiber using the same MF-ready inspection scope.

Watch it in action: [MPOvideo](#)

AUTOMATIC PASS/FAIL CONNECTOR CERTIFICATION

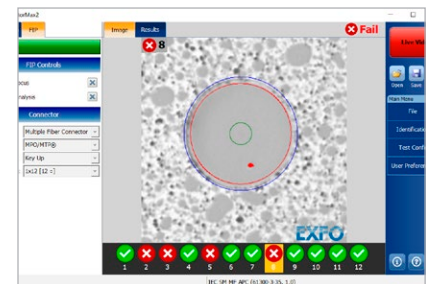

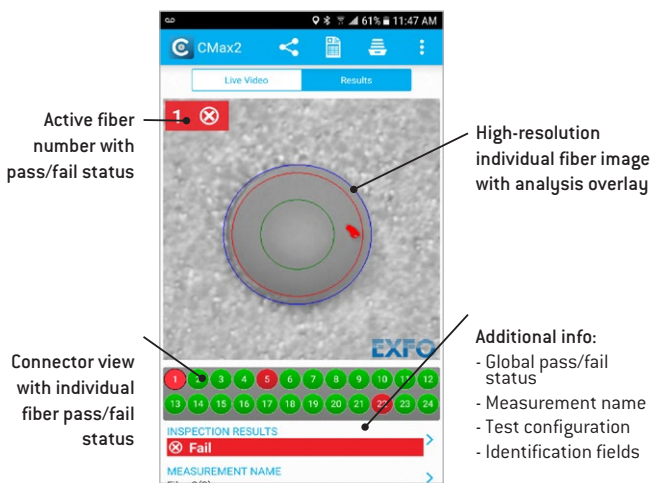

Thanks to its onboard advanced software algorithm, ConnectorMax2 performs automated pass/fail analysis within seconds and ensures that no fibers are skipped.

- No need to follow fibers and count them manually: interface will number each fiber automatically and assess the pass/fail status of the entire connector as well as each individual fiber.

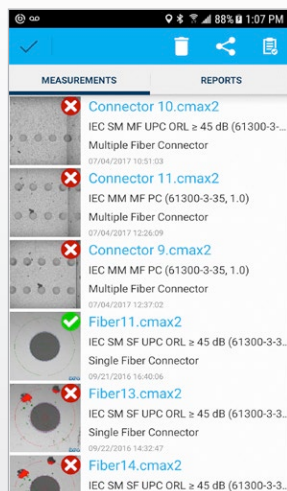

EXFO's interface enables a quick assessment of the entire multifiber connector in a single view.

- Access single fiber as well as the entire connector pass/fail status all at once by means of a simple interface without providing fail status that could result from unused or missing fibers.
- Quickly navigate through individual high-resolution fiber images on demand by selecting fibers in the connector view or simply by swiping over the fiber image.

ConnectorMax supports various fiber configurations within multifiber connectors. This feature speeds up the inspection and analysis process by skipping unused fiber locations.

ConnectorMax includes complete documentation capabilities, accessible in the palm of your hand from your mobile device. You can archive your results as well as easily create and share reports within seconds.

MAX-FIP TEST UNIT

The MAX-FIP features the largest screen in the industry, providing the highest magnification level for precise viewing of even the smallest defects on fiber endfaces. Its bright 7-in touchscreen ensures fast and easy operation of the instrument.

MAX-FIP kit can also be equipped with a power meter and visual fault locator (plug-and-play options).

MAX-FIP KEY FEATURES

- Bright, 7-in touchscreen display
- Rugged, compact tablet-inspired form factor
- Power meter and visual fault locator (VFL) (plug-and-play options)
- Full-day, rechargeable Li-ion battery
- WiFi and Bluetooth connectivity (plug-and-play options)

The power meter and VFL piece are offered as an easy-to-install option on the MAX-FIP display that's as simple as removing four screws.

PACKAGED FOR EFFICIENCY

- | | |
|-------------------------------|---|
| 1 Stylus | 6 AC adapter |
| 2 Power meter | 7 Home/switch application and screen capture (hold) |
| 3 Visual fault location | 8 Power on/off/standby |
| 4 10/100 Mbit/s Ethernet port | 9 Battery LED status |
| 5 Two USB 2.0 ports | |

EXTENSIVE STORAGE CAPABILITY

The MAX-FIP standard 2 GB internal memory offers extensive storage of up to 4000 fiber certification results, and is expandable using USB memory sticks, optional WiFi and Bluetooth capability for cloud-based storage, and wireless FIP-425/FIP-435B connectivity.

BEST-IN-CLASS AUTONOMY

Take full advantage of the MAX-FIP's amazing eight-hour battery operation that never lets you down, and enables you to complete full-day jobs without having to recharge the unit. Also, save money by not having to pay expensive battery replacement costs associated with other handheld inspection kits on the market operating on standard alkaline batteries.

VERSATILE BENCHTOP SOLUTION FOR LABS AND MANUFACTURING

The FIP-430B can be quickly transformed into a benchtop inspection solution by mounting the scope on a desktop support stand (GP-2182, sold as accessory). This leaves your hands free for repetitive manipulations and inspection of fiber jumpers and connectors. This makes the FIP-430B scope a handy solution for the production floor for inspection of both patch cords and bulkheads.

- Stable hold and rugged design
- Adjustable angle up to 7 different positions
- Allows male and female connector inspection using the same tool
- Quick release handle
- Manufacturing automation using REST API available upon request

Inspecting and analyzing fiber connector endfaces has never been easier with this digital fiber inspection scope.

BRING IT EVERYWHERE WITH THE BELT HOLSTER (OPTIONAL)

GP-2224*

The perfect accessory to carry:

- 1 x FIP-415B/FIP-425B/435B unit
- 2 x IBC cleaner tools
- A selection of fiber inspection tips
- Smartphone
- FLS-140 VFL (or pen)

*Accessories not included.

HANDS-FREE UTILITY BAG (OPTIONAL)

To help optimize your test process and get maximum performance from your MAX-FIP solution, EXFO offers a hands-free utility bag that ensures secure, hands-free operation of the unit when you are working with fibers, connectors and inspection tools.

MAX-FIP HOOK SUPPORT (OPTIONAL)

The MAX-FIP hook support is an optional accessory that fits any type of fiber cabinet door perfectly, enabling hands-free operation for easier and faster fiber manipulation during the connector certification test process.

Using the optional GP-2176 hook for the MAX-FIP.

Patchcord tips

- FIPT-400-U12M = Universal patchcord tip for 1.25 mm ferrules
- FIPT-400-U12MA = Universal patchcord tip for 1.25 mm ferrules APC
- FIPT-400-U16M = Universal patchcord tip for 1.6 mm ferrules
- FIPT-400-U20M2 = Universal patchcord tip for 2.0 mm ferrules (D4, Lemo)
- FIPT-400-U25M = Universal patchcord tip for 2.5 mm ferrules ^d
- FIPT-400-U25MA = Universal patchcord tip for 2,5 mm ferrules APC ^e

Multifiber tips

- FIPT-400-MTP2 = MTP/MPO UPC tip for bulkhead adapter
- FIPT-400-MTPA2 = MTP/MPO APC tip for bulkhead adapter
- FIPT-400-MTP-MTR = MTP/MPO Multi-Row UPC tip for bulkhead adapter
- FIPT-400-MTP-MTRA = MTP/MPO Multi-Row APC tip for bulkhead adapter

Tip kits

- FIPT-400-LC-K = LC tip kit including:
 - FIPT-400-LC: LC tip for bulkhead adapters,
 - FIPT-400-LC-APC: LC/APC tip for bulkhead adapter,
 - FIPT-400-U12M: Universal patchcord tip for 1.25 mm ferrules,
 - FIPT-400-U12MA: Universal patchcord tip for 1.25 mm ferrules APC
- FIPT-400-LC-K-APC = LC tip kit including:
 - FIPT-400-LC-APC: LC/APC tip for bulkhead adapter
 - FIPT-400-U12MA: Universal patchcord tip for 1.25 mm ferrules APC
- FIPT-400-LC-K-UPC = LC tip kit including:
 - FIPT-400-LC: LC tip for bulkhead adapters
 - FIPT-400-U12M: Universal patchcord tip for 1.25 mm ferrules

a. Available if power meter selected.

b. Includes ConnectorMax 2 software.

c. This list represents a selection of fiber inspection tips that covers the most common connectors and applications but does not reflect all the tips available.
