

S326 Cleaver

High Precision Optical Fiber Cleaver

NEW

With its ergonomic and light weight design, the S326 cleaver offers the operator the versatility to cleave on a work bench or in the palm of their hand. The reduced lid size and wide opening angle facilitates fiber loading and improves stability resulting in better single and ribbon fiber cleaves. Just pressing the lever completes the fiber cleave and automatically collects the waste. With 24 positions, the long life-time blade achieves numerous cleaves. The S326 cleaver offers optical fiber cleaving for a full range of OSP and OEM applications. The S326A configuration comes with both the regular and large size fiber waste bin or users can choose the smaller S326B option without a bin.
